Connie,
Please add anything else you have and forward on to Jennifer (and cc me). Thank you!!
Cathy

Jennifer,

Please add to the weekly.

The Oak Ridge City Council has invited TDEC to a council working session on April 20 to discuss the proposed landfill (EMDF). EPA and DOE have also been included in the invitation. The quarterly Senior Leadership team meeting is scheduled for April 22, and will focus on the EMDF including discussions of the ROD schedule, the mercury proposal, implementing the Administrator's waste water decision, waste acceptance criteria, and schedule challenges. EPA issued approval of the ETTP Zone 2 Exposure Unit 21 Remedial Action work plan addendum, in order for DOE to get started on the proposed excavation in a relatively large, TCE-contaminated area. The approval specified that DOE/EPA/TDEC must agree/approve a waste water management approach prior to discharging any waste water.

RPM prepared and started routing for approval of the Addendum 5 to the 2007 Phased Construction Completion Report. The remedial action reports on the remediation of the K-1071 Concrete Pad in the K-1070 C/D Burial Ground. The remedial action, which addressed Uranium isotopes, was completed in 2016 but the report was delayed in being

submitted for approval.(New Line)(New Line)RPM approved a phased task order for TechLaw to begin evaluating documents associated with the Bear Creek Watershed. The purpose is to identify data gaps that may impact environmental assessment of risk.

Subject: ORR Update Needed for Weekly Report

Importance: High

Greetings,

Randall would like to include an update in the weekly report for Oak Ridge. The last update relevant to the RA's office is below (reported on April 5th). Could you update accordingly and provide to me this morning? I did not see an update in SAMS on the below detail provided. Thank you in advance.

Oak Ridge Reservation, Oak Ridge, TN: EPA issued comments on the FY 2021 DOE Appendix J, which identifies the outyear projects for FY+4 to project completion. The EPA's comments included identifying treatability studies that will be necessary for project evaluation; adding additional milestones for EMDF; adding Bethel Valley milestone; consider identifying milestones for ETTP Main Plant; applying a "lessons learned" approach for ETTP Zone 1 groundwater; and adding milestones for Bear Creek Valley. On April 5th, a data review meeting is planned to evaluate the information DOE collected for the Lower Watts Bar Reservation/Clinch River sediment project. The information is necessary for the next Five-Year Review due to be final in 2022

Sincerely,

Jennifer Guillard
